Hiring Manager
ITS Logistics
Reno, Nevada

Dear Hiring Manager,

My name is Md Nahid Rahman, and I am writing to apply for the Associate Data Analyst position at ITS Logistics. I discovered this opportunity while researching data-driven organizations where I could apply my skills in Python, SQL, Excel, Power BI, and Tableau to support business operations. ITS stood out for its strong commitment to innovation, cross-functional collaboration, and continuous improvement—values that closely align with my academic and professional experience.

During my internship at Americas Best Value Inn and through projects at Arkansas State University, I developed a strong foundation in data transformation and visualization. I worked with large booking datasets using SQL, built predictive models in Python to forecast demand, and created dashboards that guided pricing and operational strategies. One key project involved collaborating with a team to reduce cancellation rates from over 40% to under 8% while improving overall bookings. In another, I developed a Power BI report to analyze and communicate air quality trends across U.S. states, tailoring insights for both technical and business audiences.

What excites me most about ITS Logistics is the opportunity to contribute to a fast-paced, analytics-driven environment focused on optimizing supply chain performance. I am eager to bring my technical skills, problem-solving mindset, and collaborative approach to your team and grow alongside experienced professionals.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can support your data initiatives and contribute to your mission of delivering operational excellence.

Sincerely,
Md Nahid Rahman
